What's happening at

Since we opened our doors in 2002, we have developed professional and personal relationships with you and many other wonderful colleagues around the U.S. and the world. This is one way that our team can stay in touch, keeping you up-to-date with what’s happening in pediatric and obstetric simulation.
Stay Tuned for a Limited Time Offer

**Online Debriefing Program**

The Center for Advanced Pediatric and Perinatal Education (CAPE) has launched an online offering, *Strategies for Debriefing Healthcare Scenarios*. Based on lessons learned from colleagues at NASA, the FAA and other industries where the risk to human life is high, this training course will help you master the art of debriefing, one of the most effective strategies for empowering healthcare professionals to deliver safe, high-quality patient care. If you are a novice or an experienced debriefer looking for ways to enhance your skills, [Register Online](#) to take advantage of this CEU and CME-accredited program and share this opportunity with your colleagues.

There will be more details on an exclusive offer in our Winter Newsletter.

"Dr. Halamek is a leader in simulation and in the field of debriefing. For all of us in the simulation community, our goal is to improve individual and team performance and the outcomes of patient care. The debriefing method advanced and taught by Dr. Halamek and his colleagues at Stanford focuses primarily on improving our team performance and patient care...

This method has its roots in the debriefing methods used by the military and NASA for many years. It has proven to be an effective and efficient form of debriefing. This is the debriefing method that I use most frequently and I highly recommend this method to you. I believe if you try it, you will use it as your primary debriefing method as well."

Mary Patterson, MD, MEd

See you at IMSH 2020

Come find CAPE at the International Meeting on Simulation in Healthcare, January 18-22, 2020 in San Diego. We will have a booth with a raffle, free giveaways, and plenty to discuss. Read more about IMSH here.

Find our booth by clicking here.
Attending Laerdal SUN
"We have to be consistent in our approach to training, so junior people are well prepared to integrate with their senior colleagues as they begin to assume the responsibility of caring for patients." - Lou Halamek, MD.

CAPE's founder and director, Lou Halamek, MD presented on "Creating a Culture of Critique in Healthcare" at this year's Laerdal Simulation Users Network conference in Las Vegas, NV.

Invited Panelist
Janene Fuerch, MD recently served as a panelist alongside fellow neonatologists Bobbi Byrne, MD and Anne Ades, MD at the 3rd Annual Neonatal Resuscitation Symposium at Oklahoma University. The topic: "Innovative Learning Methods in Resuscitation Education".
Julie Arafeh, RN, Senior Simulation Specialist and Instructor at CAPE led a presentation on "Facilitating Discussion To Build Highly Reliable Teams and Improve Systems" at the 2019 Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) convention in Atlanta, Georgia.

Why We Exist

Our Vision
A world in which all people receive the safest, most effective and efficient healthcare possible.

Our Mission
To lead the innovation and dissemination of novel methods for improving human and system performance in the delivery of healthcare.
