

What's happening at

Spring 2020

Since we opened our doors in 2002, we have developed professional and personal relationships with you and many other wonderful colleagues around the U.S. and the world. This is one way that our team can stay connected, keeping you up-to-date with CAPE's ongoing contributions to pediatric and obstetric simulation, innovation, and research.

Feeling confined? CAPE is online

[Online Debriefing Program](#)

The [Center for Advanced Pediatric and Perinatal Education \(CAPE\)](#) has launched an online offering, [Strategies for Debriefing Healthcare Scenarios](#). Based on lessons learned from colleagues at NASA, the FAA and other industries where the risk to human life is high, this training course will help you master the art of debriefing, one of the most effective strategies for empowering healthcare professionals to deliver safe, high-quality patient care. If you are a novice or an experienced debriefer looking for ways to enhance your skills, [Register online](#) to take advantage of this CEU and CME-accredited program while opportunities for face-to-face training are restricted due to social distancing.

[Click Here to Enroll](#)

CAPE's Impact

"Clear and concise, this course drives debriefing skill to a new level. Professional and matter-of-fact debriefing will help simulationists improve faster so generations of simulation participants can benefit. A patient-centered emphasis is a key tenant! This course absolutely helped me understand how to improve my debriefing skills."

Jared W. Henricksen, MD
Associate Professor, Division of Critical Care
Department of Pediatrics
University of Utah School of Medicine
Primary Children's Hospital Simulation Director
Intermountain Simulation Consortium Director

Latest News

[See you at IPSSW 2020](#)

Come find CAPE at the International Pediatric Simulation Symposia and Workshops, October 23-26, 2020 in St Petersburg, Florida at Booth #8. Our team will be there with a raffle, free giveaways, and plenty to discuss. Read more about IPSSW 2020 [here](#).

CAPE's CounselSim Program in Fresno

CAPE recently hosted a program for the Community Regional Medical Center in Fresno, CA. Neonatologist and CAPE alumnus, Dr. Anand Rajani writes,

"...Many neonatologists in my group had never experienced the power of simulation first-hand. All were amazed by the power of video and how much we could all learn from one another when it comes to communicating effectively with our patients. Every physician has shared their gratitude for the opportunity and has felt that this has positively impacted how they doctor."

From left to right: Drs. Nicole Yamada, Lou Halamek, Anand Rajani, and Janene Fuerch.

Seminars in Perinatology

The December issue of *Seminars in Perinatology* focuses on patient safety. A chapter on briefing, simulation and debriefing describes how three high-consequence industries (healthcare, aerospace and the military) use these activities to enhance safety. Dr. Halamek is the lead author.

Halamek LP, Cady R, Sterling MR. Using briefing, simulation, and debriefing to improve human and system performance.

Semin Perinatol 2019;43(8):151178. Aug 10;epub ahead of print. PMID [31500845](https://pubmed.ncbi.nlm.nih.gov/31500845/).

Additional Contributions by CAPE Faculty:

Developing safe devices for neonatal care.

Fuerch JH, Sanderson P, Barshi I, Liley H.

Semin Perinatol 2019; 43(8):151576. Aug 10;epub ahead of print. PMID [31662216](https://pubmed.ncbi.nlm.nih.gov/31662216/).

Yamada NK, Catchpole K, Salas E. The role of human factors in neonatal patient safety. *Semin Perinatol* 2019;43(8):151174. Aug 10; epub ahead of print. PMID [31477264](#).

[Induction to the Society of Pediatric Research](#)

CAPE's Associate Director, Dr. Nicole Yamada, was recently inducted into the Society of Pediatric Research. Click [here](#) to view all new members.

[CAPE at Christmas in the Park](#)

Did you see CAPE's tree this holiday season at Downtown San Jose's Christmas in the Park? CAPE created ornaments with recycled neonatal resuscitation supplies such as ETT's, tubing and t-pieces, making its tree one of the most unique of the 500+ displayed.

Farewell, Lilly

CAPE recently said goodbye to our Program Manager, Lilly Hermann, as she and her family moved to Irvine, CA. We are very thankful for the countless contributions that Lilly made during her tenure at CAPE. We wish her well in her next endeavor. Thank you, Lilly, you will be missed.

Why We Exist

Our Vision

A world in which all people receive the safest, most effective and efficient healthcare possible.

Our Mission

To lead the innovation and dissemination of novel methods for improving human and system performance in the delivery of healthcare.
